

# FRESNO DENTAL SURGERY CENTER

**YOUR CHILD'S CARE IS OUR FIRST PRIORITY**  
**GENERAL DENTISTRY SERVICES**  
**FOR CHILDREN UNDER GENERAL ANESTHESIA**

**Our team strives to manage details in advance so parents and patients have a first class experience that exceeds expectations.**

Fresno Dental Surgery Center is a California State Licensed and Medicare Certified Facility with highly experienced dentists and anesthetists who will provide all your child's dental needs under general anesthesia in one appointment. Our trained staff is highly qualified to render the best, most compassionate care possible.

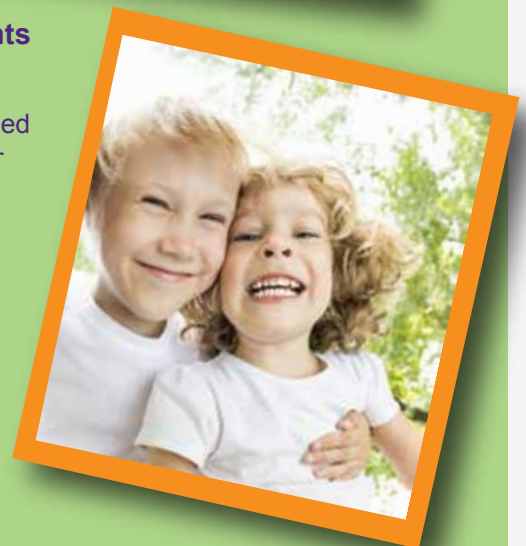

You can rest assured that your child will receive the best care available. We use the latest technology, including digital x-rays, intra-oral photographs, state of the art sterilization in a child friendly environment.

**Q: Why would my child need general anesthesia just to have their teeth fixed?**

**A:** General anesthesia is recommended to perform all of the child's dental treatment in a safe and comfortable manner when they are unable to be treated in a conventional dental office.

**Q: Why can't my child eat or drink before surgery?**

**A:** General anesthesia must be performed on an empty stomach. Eating or drinking before surgery will cause the cancellation of your child's surgery. Eating or drinking includes water, ice or gum.
